

# **\$197 Duct Cleaning According the ENVIRONMENTAL PROTECTION AGENCY...Your INDOOR AIR IS UP TO 100 TIMES**

## **DIRTIER than outside.**

When the coughing and sneezing starts is when we usually start getting phone calls for cleaning ducting. Coughing usually begins as dry, hacking cough which may develop from an upper respiratory irritant, such as a dust and debris that can fly about your home through the use of your forced air heating and air conditioning system.

An air duct cleaning and repair service, may not be the first thing that comes to mind when discussing your home maintenance..... but in all reality, it is often this forgotten service that can be your key to better

health through cleaning indoor air.

## **Added Bonus - Improving Your Air Quality Outside the Box**

If you are looking for a company to clean your ducting, be cautious, your system cannot be properly cleaned without removing electrical components, blowers, housing and other parts of your system. This can only be performed by a licensed heating and air conditioning contractor.

## **Many Duct Cleaning Companies do More Harm Than Good**

Carpet cleaning companies should not be tearing into your heating and air conditioning system anymore than your gardener should be roofing your home. Brushes through some types of flex duct can and do destroy the ducting. High pressure air in ducting that contains asbestos can do contaminate the entire home.

## **We are trying to right that wrong by offering you a FREE Evaluation**

We are going to perform for you a free **National Comfort Institute HeatMaxx or CoolMaxx System Survey** to determine why your ducting is suffering from

dirt. Many times we find out that a little system tweaking will allow your system to operate much cleaner and healthier for you and your family. Both return air ducting (before the furnace) and supply air ducting (after the furnace) can pull in unwanted contaminated air and spread that air through your home. Our quick and free survey will help to determine where the problems are, if any, and we can give you a recommendation to ensure that you never need to have your ducting cleaned again. Now, isn't that a little outside the box?

**If your ducting is dirty, there is a reason and we will find out why.**

There are a myriad of different things that you can do that cost little to no money to improve the air quality and living conditions inside your home. It is our job to ensure that your indoor air quality gets a fair shake at being healthy for you and your family. It all starts with a simple phone call from you to us. Stop breathing contaminated air.

**We can prevent this, you don't have to pay one single dime for it.**

If, you are looking for a Company, which can really eliminate a dust problem and clean the air in your home, your search is ended... You've just found one.
