

Free Air Conditioning Service Call

Every single day this summer we will perform the first 15 booked service calls for a free diagnosis.

The typical air conditioning service call takes about 5 to 15 minutes to diagnose. We decided, because of the economy and the hardships that homeowners have been facing that we would perform, and reward, those early booking appointments with a free diagnosis. The first 20 minutes (more than enough time for over 90% of all A/c service calls) will be at no charge.

This is for Owner Occupied Homes Only

Rental units, apartments and commercial buildings are not included in this free special. Occasionally a diagnosis will take longer than 20 minutes or some repairs may need to be made in order to find out everything that ails your home air conditioning system. If that is the case, you will be given an estimate upfront before you are obligated to invest any money whatsoever in your air conditioning system.

This coupon must be printed out and given to the service professional before service begins

This is only for the first 15 service calls. When you call in ask for this special and let us know that you are printing this coupon. We will work you into the schedule. If have all of our 15 free service calls booked for the day, feel free to book your free service call for the next day. It is that easy.

Why Only 15 Service Calls for Free?

Because we need time between the call to service our maintenance agreement clients. They always receive service the same day they call as we are under contract to provide as close to instantaneous service as possible. Ask our service professional when he arrives about saving money and extending warranties as well as front of line service by investing in a low cost Ultimate Maintenance Agreement.
